SECTION 4. FIRST AID MEASURES

If inhaled:

Remove to fresh air. If breathing is labored or stopped, give artificial respiration. Get immediate medical attention.

In case of skin contact:

Wash area of skin with soap and water.

In case of eye contact:

Flush eyes with plenty of water for at least 15 minutes. Seek medical attention if irritation develops or persists.

After Ingestion

If victim is conscious and alert, give large quantities of water to induce vomiting. Seek medical attention immediately.

SECTION 5. FIREFIGHTING MEASURES

Fire

Not considered to be a fire hazard. Not flammable.

Explosion

Not considered to be an explosion hazard.

Extinguishing Media

This material is not combustible and is not anticipated to react with commercially employed extinguishing media. Use appropriate extinguishing media for surrounding fire.

SECTION 6. ACCIDENTAL RELEASE MEASURES

Spill Procedures

Protect against identified hazards through use of prescribed personal protection equipment, proper work and hygiene practices. Limit foot and vehicular traffic to minimize mechanical agitation and

dispersion. Employ a vacuum, equipped with HEPA (High Efficiency Particulate Air) filter, for clean-up of the spill material. If no vacuum is available, use a broom and shovel to collect excess powder in the area. Recover uncontaminated material for use. Vacuum or sweep remaining material keeping dust to a minimum. Residual material should then be cleared, utilizing the process of wet sweeping, to avoid dust generation.

Containment Techniques

This is a solid material and will not travel far from the spill location unless mechanically agitated.

Spill Response Equipment

The following equipment is recommended for spill response:

- vacuum, equipped with a HEPA filter
- broom, wet mop
- dustpan, shovel, or scoop
- bags, drums or sacks for collection

Personal Protective Equipment

All personnel should utilize the following protective equipment when performing spill response activities:

- gloves (rubber or leather)
 - safety glasses or goggles
 - respiratory equipment as recommended in Section 8
-

SECTION 7. HANDLING AND STORAGE

Storage

A moderately dry, well-ventilated area is considered adequate for handling and storage. Usual precautions for nuisance dust should be followed.

Handling

When handling this product, all personnel are directed to:

- Wear all specified elements of PPE, as directed by this document, or under location specific requirements, whichever is more conservative.
 - Avoid creating dust, where possible.
-

SECTION 8. EXPOSURE CONTROLS/PERSONAL PROTECTION

Engineering Controls

Use with adequate ventilation to meet exposure limits listed in Section 2.

Respiratory Protection

Use NIOSH-approved dust respirator, if overexposure exists.

Skin Protection

Leather or rubber gloves.

Eye/Face Protection

Safety glasses, goggles or face shield are recommended.

Work Hygiene Practices

- To control potential exposures, avoid creating dust.
- Do not eat, drink, smoke, or perform other hand-to-mouth activities in product use or handling area.
- Wash thoroughly after handling this product. Iron carbonate ACGIH TLV (United States, 1/2005).
